

ISH24 Sentry Connect

Confined Space Management Technology

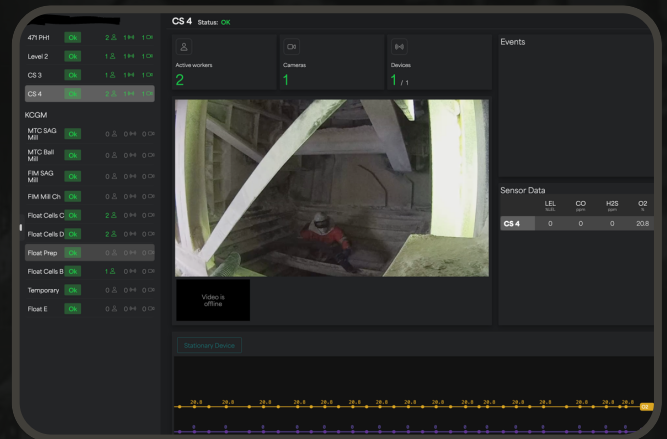

Sentry Connect is the latest technology created by ISH24 allowing an innovative approach to monitoring multiple confined spaces in any location.

Perfect for remote sites & heavy industrial shutdowns with limited resources for space, accommodation, mobilisation & other logistics potentially saving clients thousands of dollars each outage.

Sentry Tablet

- Monitoring 4 spaces at once
- Checking workers in/ out
- Automatic alerts for critical conditions

Sentry Control

- Assigns Sentry to site/confined space
- Monitors full site hazard readings
- ESO access with an overview of spaces, workers and connected devices

INNOVATION IN SITE
SAFETY FOR THE FUTURE OF
AUSTRALIA'S WORKFORCE

This solution equips Sentry, Site Control, and Emergency Response Teams with comprehensive visibility into onsite conditions, allowing for proactive management of safety risks and improved response times.

Sentry Connect allows one sentry to monitor up to 4 spaces at the same time, with real-time atmospheric readings being displayed on the **Sentry Tablet**. The platform also enables the integration of multiple devices and data feeds into a single user interface.

Compatible with new **MSA ALTAIR io™ 4**
Gas monitoring with fully integrated cellular connectivity for real-time visibility across your worksites

- ✓ Gas Detection
- ✓ Dust & Silica (Troxel XD, XS, XD1+)
- ✓ Asbestos (Alert Pro Technologies)
- ✓ Weather (BOM data or AQ Mesh Station)
- ✓ Noise (Casella in testing)
- ✓ Heat Stress (Kenzen in testing)
